

# TechCon Asia Pacific 2002

## Table of Contents

### *In Order of Presentation at the Conference*

Geomagnetic Induced Current Detection and Monitoring Tom Breckenridge .....	1
Economically Optimal Transformer Rating Leith Elder .....	17
Transformer Mid-Life Refurbishment – Prevention or Cure? Ken Budin .....	27
Transformer Risk Assessment Consideration Victor Sokolov .....	51
Condition Monitoring and Life Extension of HV Indoor Switchgear Malcolm Boyd .....	71
Cable Monitoring of Power Cables Ken Barber .....	85
Investigation of Transformer Bushing Failures in South Africa Using Off-Line Condition Monitoring Techniques H.C. Fourie, I.J. Van Wyk .....	103
Practical Applications of Diagnostic Testing for HV Plants in the UK Electricity Industry Dr. Dawn Miller .....	115
Tap Changer Maintenance and Development Keith Baird.....	125
Three Condition Monitoring Tools, Powercor Experience Col Feely .....	147
Transformer Fluid: A Powerful Tool for the Life Management of an Aging Transformer Population Armando Bassetto .....	169

Determination of the Most Suitable Mix of Maintenance Strategies for an Underground Power Distribution Network Paul Dyer .....	191
Oil Dependent Gas Formation in Transformer Oil Kjell Sundkvist .....	211
Moisture Assessment in Power Transformers: Lessons Learned Valery Davydov .....	217
Insulation Systems Analysis for High Power Density Transformers Richard Provost .....	235
Transformer Failure Investigations Arne Peterson .....	247
Managing High Voltage Current Transformers and Bushings Using On-Line Insulation Monitoring Techniques Terry Krieg.....	261
Pressure Relief Valve Efficiency Calculations by Comparison to the SERGI Transformer Protector during Transformer Short-Circuits David Scheurer .....	285
Parameters Involved in Transformer Loading Harold Moore.....	311
