

# TechCon® Asia Pacific 2006

## Table of contents

*In order of presentation*

**Condition Based Maintenance of Transformers: Back to basics**

Tom Breckenridge

**Transformers: Condition Based Ranking**

Victor Sokolov

**New Diagnostic tools for power transformers**

Michael Kruger

**Condition Monitoring of OLTC's using vibration analysis**

Kerry Williams

**The use of fibre optic temperature monitoring systems for lower rated transmission and distribution transformers**

Sharon Walsh (presented by Mark Lotter)

**Research and development into UAV's for cable monitoring and maintenance**

George Curran & Torsten Merz

**Revolutionising underground cable reliability**

Donald Bainbridge

**Mineral transformer oil vs. alternative fluids as insulating liquid**

Maria Eklund

**Real time moisture monitoring of power transformers**

Senja Paasimaa

**Transformer condition diagnosis using frequency response analysis**

Barry Finlay

**Dissolved Gas Analysis (DGA) and the Duval Triangle**

Michel Duval

**Transformer Protection: live tests on large transformers – Analysis & Simulations**

Heloise Cuny & Guillaume Perigaud

**Transformer management: a strategic condition based approach**

Bradley Trethewey

**Transformer moisture monitoring and dehydration – Powercor experience**

Colin Feely
