

Table of contents

In order of presentation

Monitoring, Diagnosis & Life Management of Power Transformers H. Borsi, E. Gockenbach	1
Review of In-Service Transformers Using Natural (Vegetable Oil) Ester Dielectric Fluid C. Patrick McShane, John Luksich	27
Advanced Tools for PD Monitoring of Power Transformers Sacha M. Markalous, Thomas Strehl, Karl Haubner	45
Multi-Channel Synchronous PD Measurements on Power Transformers Caspar Steineke	57
The Seven C's of Partial Discharge – A Manufacturer's Perspective Christiaan E. Odendaal	69
Vacuum Interrupters as an Alternative to Traditional Arc Quenching in On-Load Tap-Changers Lars Jonsson, David Sundqvist	85
“Requirements for Power Transformer Operations and Maintenance” Part 1 – Theory and Tools A. J. Kachler	101
On-line Dryout of Old Transformer at CitiPower, Melbourne Ross Polvere, Andrew Reykherdt, Valery Davydov, Oleg Roizman	121
Risk Assessment of Explosive Failures, Major Oil Spills in Transformers and Strategies to Reduce such Risks Arne Petersen	145
Applying ‘On-Line/On-Load Vacuum Dehydration Purification’ – Moving Forward, Not Sideways Geoff Manley	161
“Requirements for Power Transformer Operations & Maintenance” Part 2 – Practical Experience A. J. Kachler	177
Methods for Increasing the Reliability, Availability and Life Duration of Power Transformers H. Borsi, E. Gockenbach	195
New Requirements on Transformer Oil - Impact on Test Methods Oil Manufacturing and Oils in Service Helene Odelius, Kjell Sundkvist	213
Diagnostic Measurements on Power Transformers Michael Krüger, Alexander Kraetge, Maik Kock, Hossein Borsi, Ernst Gockenbach	227
Paper Ageing and Transformer Life – An Experience with On-Site Refurbishment of GSU Transformers Ken Budin	249
